[github.com/Koundinya2003](https://github.com/Koundinya2003) · [linkedin.com/in/adityakkoundinya](https://linkedin.com/in/adityakkoundinya)

CS graduate and NextLeap PM Fellow targeting AI Product Manager and APM roles. Built 4 deployed AI products, 2 MVPs, and 4 PRDs, combining user insight, data, and AI to solve real product problems.

## EXPERIENCE

**Bosch Automotive Electronics India** · Business / Data Analyst Intern Bengaluru · Jul 2024 to Dec 2024

- Ran discovery interviews with maintenance and quality engineers to clarify requirements and translate the underlying problem into a structured reporting solution.
- Defined MTTR, MTBF, Technical Availability and Technical Loss, then shipped four dashboards on them (downtime, maintenance, tooling, quality) so engineers read the numbers instead of requesting a pull.
- Automated the KPI refresh in Python, Oracle SQL and HiveQL, feeding Tableau across 17 production lines.

## MVPS

**Nykaa Fit** · wishlist to purchase conversion · NextLeap capstone [Live Demo ↗](#)

- Traced stalled wishlist purchases to one question, what size, then matched measurements to each brand's own chart: the same body is S at one brand, M at another.
- Returns no size when the match is not clear: a wrong size costs more than one extra scroll.
- Primary metric: wishlisted items bought in 30 days. Withheld picks log as events, so the funnel reads no data, not 0%.

**Blinkit** · **Intent to Basket** · natural language ordering [Live Demo ↗](#)

- Turns "dinner for 4 under Rs 600" into a filled cart: the shopper states an outcome, the product does the maths.
- The model may only pick from a 329 item catalogue, so a bad result is a bad choice, never an invented product.
- Over budget it swaps pack sizes first, then drops optional ingredients, and shows every change it made.

## AI PROJECTS

**AI Discovery Engine** · opportunity ranking from public reviews [Live Demo ↗](#)

- Scraped 1,472 posts from Play Store, Reddit and YouTube, classified 1,023 on rules, ranked why people do not buy.

**FundBot** · facts only mutual fund FAQ [Live Demo ↗](#)

- Answers on four Mirae Asset schemes from 47 documents only and says so when it cannot. 41 question eval per push.

**Job Search and Outreach Workspace** · live verified postings, no guessed emails [Live Demo ↗](#)

- Shows no posting until fetched and checked live, never guesses a recruiter email. 236 offline tests hold both rules.

**Wealth Coach AI** · allocation planning from a personal profile [Live Demo ↗](#)

- Turns income, expenses, age, goal and risk appetite into an allocation plan, with a growth simulator.

## PRODUCT CASE STUDIES AND PRDS

**Canara Bank × Engati** · Day 0 pitch, six KPI scorecard, Day 180 renewal · illustrative scenario [View Case Study ↗](#)

**ChatGPT voice input, urban India** · three directions, the one I picked and why [View Case Study ↗](#)

**n8n onboarding and activation** · blank canvas paralysis named as the churn risk [View Case Study ↗](#)

**Eureka by ALLEN** · commitment asked before value is felt; localisation first [View Case Study ↗](#)

## SKILLS

**Product:** Product discovery, user research, PRDs, MVP scoping, prioritisation, KPI trees, experiment design

**AI:** LLM product design, RAG and grounding, evals, guardrails, refusal design

**Analytics:** SQL (Oracle, HiveQL), Python, Tableau, funnel analysis, instrumentation

**Build:** TypeScript, React/Next.js, FastAPI, PostgreSQL, GitHub Actions

## EDUCATION

**Vellore Institute of Technology, Bhopal** · B.Tech, Computer Science 2021 to 2025 · GPA 7.7/10

**NextLeap** · Product Management Fellowship, Cohort 47 Mar 2026 to Jun 2026
